HAMIDI HAMAT

SOFTWARE ENGINEER
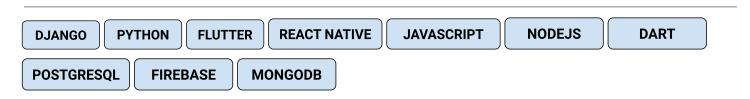

Phone: +60 - 1151214897

Email: nikhamidi97@gmail.com

Github: github.com/nikhamidi97

Software Engineer with Technical expertise in Django, Python, JavaScript, and Flutter. For the past 2 years I have been working as a backend developer with a focus on Python(Django). During this time, I have gained extensive experience in creating bespoke web applications and developing high-performing APIs for web applications. Additionally, I have built numerous custom widgets using Flutter and implemented various features within existing Django sites. Passionate to seek for new knowledge and try out new technology.

PROFESSIONAL EXPERIENCES

Insurtech Automation / Tigerlab, Petaling Jaya
JUNIOR BACKEND ENGINEER   *May 2022 - Present*

Tigerlab sdn bhd is an Insurtech company that provides a solution and automation for insurance companies mostly from Europe. I work as a junior backend engineer using Django Framework (Python + Postgres). We use the agile/scrum method in daily productivity. Being exposed with Django Architecture such as model serializer, django templating, custom setting for dev, testing and production environment.

Stock Market Prediction Web App / Aisara, Kuala Lumpur
SOFTWARE DEVELOPER   *Feb 2021 - Apr 2022*

Aisara sdn bhd is an AI tech company focusing on providing AI solution in Oil and Gas field. Working closely with Petronas Research sdn bhd. This company is a start up company so I'm deeply involved with research and development to implement AI solutions in Oil and Gas matters. Being exposed and mostly working on Django projects (Python + NodeJS + Mongodb) and also participating in side projects using Flutter Framework which focuses on implementing AiSara Model in mobile application.
